Akademia Wychowania Fizycznego w Katowicach

Part B of diploma no. 14885 SUPPLEMENT *)

(COPY)

I. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

1. Surname: JAWORSKA
2. First name(s): MAŁGORZATA AGNIESZKA
3. Date of birth (day, month, year): 18 March 1982
4. Student identification number or code: 25809

II. INFORMATION IDENTIFYING THE QUALIFICATION

1. Name of qualification and title conferred ¹⁾: magister
2. Main field of study and field of specialisation: physiotherapy-second-cycle degree programme,
specialisation: physiotherapy
3. Name of awarding institution ¹⁾: Akademia Wychowania Fizycznego w Katowicach
Wydział Fizjoterapii
4. Name(s) and status of institution(s) in which part of the study was completed ²⁾: Akademia
Wychowania Fizycznego w Katowicach is a public school of higher education, established on the basis
of the Order of Prime Minister of September 1, 1970 concerning establishment of the Higher School of
Physical Education (Official Gazette No 22, item 182). This school was renamed "Academy" on the
basis of the Order of Prime Minister of June 16, 1979 (Official Gazette No 14, item 93). The Faculty of
Physiotherapy was established according to the Order No 22 of Minister of National Education and
Sport of August 11, 2004.
5. Language(s) of instruction/examination: Polish

III. INFORMATION ON THE LEVEL OF THE QUALIFICATION

1. Level of qualification: Master`s Degree Program
2. Official length of programme: 2 years (4 semesters)
3. Access requirements: Procedure of admission includes general health status examination and
possession of Bachelor`s degree in physiotherapy

IV. INFORMATION ON THE CONTENTS AND RESULTS GAINED ³⁾

1. Mode of study: Extramural studies
2. Programme requirements: Requirements not defined by the Minister of National Education and
Sport. The Academy uses its own programmes.

3. Programme details and individual achievements, grades/marks (ECTS) credits obtained:
The ECTS system was not used

	Number of hours		Number of days	Grade

	Lectures	Classes		Classes	Exam
1 Clinical rehabilitation	-	17	-	3,5	-
2 Bioethics	9	-	-	4,0	-
3 Master's thesis seminar	-	9	-	zal	-
4 Functional lab of locomotor system - Optional subjects	-	18	-	4,0	-
5 Diagnostics and programming of rehabilitation	18	9	-	3,0	4,0

Diploma thesis: Assessment of usefulness of "HEMI-FLEX" abduction-stabilization apparatus in patients after cerebral stroke.

4. Grading scheme and, if available, grade distribution guidance: The Academy uses the following grading scale: 6,0 – excellent, 5,0 – very good, 4,5 – good plus, 4,0 – good, 3,5 – satisfactory plus, 3,0 – satisfactory, 2,0 – unsatisfactory/fail. The average grade constitutes an arithmetical mean of all examination and credit grades received during studies, including unsatisfactory grades. The final diploma grade is a total of the following grades: 3/4 of the arithmetical mean of all grades, 1/8 of the thesis grade and 1/8 of diploma examination grade. The approximation (to a full grade) is as follows: u to 3,79 – satisfactory, from 3,80 to 4,40 – good, from 4,41 – very good.

5. Overall classification of the qualification ¹⁾: dobry

V. INFORMATION ON THE FUNCTION OF THE QUALIFICATION

1. Access to further study: Doctor's degree studies, postgraduate studies

2. Professional status (if applicable): A graduate receives professional title of physiotherapist (and the Master's degree) and is entitled to render physiotherapy treatment to patients and disabled persons, mainly the treatment pertaining to the use of natural (physical) agents in prophylaxis and treatment of various diseases.

VI. ADDITIONAL INFORMATION ³⁾

1. Additional information, including practical placements completed, research activities undertaken, awards received: Student completed 160 hours clinical training in "SP ZOZ" medical facilities in Jelenia Góra.

2. Sources of further information on the qualification obtained, including institution's website: www.awf.katowice.pl

VII. CERTIFICATION OF THE SUPPLEMENT

1. Date: 24 October 2007

2. Signature and name-bearing stamp or seal of the dean or head of the organisational unit:

DEKAN
WYDZIAŁU FIZJOTERAPII

prof. dr hab. Andrzej Markiewicz

*) This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the transparency and fair academic and professional recognition of qualifications at international and national levels. It is designed to provide a description of the nature, level, content and status of the studies that were completed. It should be free from any value judgements, equivalence statements or suggestions about recognition.

VIII. DESCRIPTION OF NATIONAL HIGHER EDUCATION SYSTEM

THE SYSTEM OF EDUCATION IN POLAND

1. School education system

Until September 1999, the first stage of education in Poland was an eight-year primary school. Primary school leavers were entitled to apply for admission to post-primary schools, general or vocational.

In addition to curricular changes, the school education reform of 1999 introduced new types of schools: a six-year primary school, a three-year gymnasium (lower secondary school), and post-gymnasium (upper secondary) schools: a three-year general lyceum, a three-year specialised lyceum, a four-year technical school, a basic vocational school where education lasts between 2 and 3 years, a two-year supplementary general lyceum and three-year supplementary technical school (with the latter two types of schools designed for basic vocational school leavers). In the transition period, post-primary schools and post-gymnasium schools work in parallel.

The total duration of education until completion of school which offers the possibility of taking the secondary school leaving examination (maturity examination) is 12-15 years. Having passed successfully the secondary school leaving examination (maturity examination), graduates are awarded a secondary school leaving certificate (maturity certificate) which entitles them to apply for admission to a higher education institution.

2. Higher education system

The higher education system in Poland includes State (public) and non-State (non-public) higher education institutions, the latter established since 1990. Non-State higher education institutions are established on the basis of a permit issued by the Minister of National Education and Sport, and acquire legal personality upon their entry into the register of non-State higher education institutions kept by the Minister of National Education and Sport.

In addition to existing university-type institutions, State and non-State higher vocational education schools have been established since 1998. A major component of training in these schools is a compulsory 15-week practical placement.

Higher education programmes may be offered as full-time, part-time or extramural studies. Full-time studies are the basic mode of study, unless the statutes of a higher education institution state otherwise. The minimum requirement for access to a higher education institution is a secondary school leaving certificate. Procedures for admission to the first year of study are laid down independently by the higher education institutions. Some institutions hold entrance examinations, other institutions admit students on the basis of the grades given on secondary school leaving certificates, and others admit solely on the basis of registration.

3. Degrees ("professional titles") awarded to graduates of higher education institutions

- *licencjat* : the degree obtained upon completion of first-cycle programmes which last 3 or 3.5 years;
- *licencjat pielęgniarstwa* or *licencjat położnictwa* : the degrees obtained upon completion of first-cycle programmes in the field of Nursing or Midwifery respectively;
- *inżynier* : awarded to graduates of first-cycle programmes in engineering and technology, except in the field of Architecture and Urban Planning, in agriculture and forestry, as well as in other fields of study where course units covering engineering and technology, agriculture or forestry account for no less than 50% of the total course load as provided for in syllabuses and curricula for these fields;
- *inżynier architekt* : awarded to graduates of first-cycle programmes in the field of Architecture and Urban Planning;
- *magister* and equivalent degrees of *magister sztuki*, *magister inżynier*, *magister inżynier architekt*, *lekarz*, *lekarz dentyista* (until 30 April 2004: *lekarz stomatolog*), *lekarz weterynarii*, *magister pielęgniarstwa*, *magister położnictwa* : awarded upon completion of 4 to 6-year Master's degree programmes offered in one cycle.

The degree of *magister* may also be awarded upon completion of 2-to 2.5-year second-cycle Master's degree programmes, undertaken by those who have completed a first-cycle programme and obtained the degree of *licencjat* or *inżynier*.

In order to obtain the above-mentioned degrees, a student is required to complete all course units and practical placements included in a syllabus, to submit and defend a thesis, and pass successfully the final examination.

In the fields of Medicine, Medicine and Dentistry, and Veterinary Surgery, the degree is awarded on the basis of the final qualifying examination required.

A graduate of a higher education institution obtains a higher education diploma in a specific field of study and, upon request, a copy of the diploma in a foreign language.

4. Higher-level degrees ("academic degrees" and "academic title")

The academic degrees are the degrees of *doktor* and *doktor habilitowany* of a specific area of science in a given scientific discipline. The degrees awarded in arts are the degrees of *doktor* and *doktor habilitowany* of a specific area of arts in a given artistic discipline (until 30 April 2003, *kwalfikacje artystyczne I stopnia* and *kwalfikacje artystyczne II stopnia* were awarded in arts and artistic disciplines, which provided the basis for conferring a qualification equivalent to the academic degrees of *doktor* and *doktor habilitowany* respectively).

The degree of *doktor* is conferred to a person who holds the degree of *magister*, *magister inżynier*, *lekarz* or another equivalent degree, has passed doctoral examinations covering the scope defined by the board of the awarding organisational unit, and has submitted and defended a doctoral thesis.

Access to the procedure leading to the degree of *doktor habilitowany* is open to a person who holds the degree of *doktor*, has significant academic or artistic achievements, and has submitted a dissertation. The procedure is completed by a resolution of the board of the awarding organisational unit conferring the degree of *doktor habilitowany*.

The degrees of *doktor* and *doktor habilitowany* are conferred in organisational units of higher education institutions and in other academic institutions which are entitled to confer them.

The academic title is the degree of *profesor* of a specific area of science, while the equivalent degree in arts is the degree of *profesor* of a specific area of arts. The degree of *profesor* is conferred by the President of the Republic of Poland.

- 1) In the case of translation into a foreign language, the names given remain in the original language.
- 2) Indicate the status of the higher education institution offering the higher education programme concerned: State, non-State / State-recognised, and, if possible, who has accredited it to provide higher education programmes.
- 3) Items IV.2-4 and points VI.1-2: pages may be added, where necessary.

***) Current page number;

****) Total number of pages.

KARKONOSZE COLLEGE
IN JELENIA GÓRA
